

MUHAMMAD NUMAN

Software Engineering Student

Email: numanamdad@gmail.com | Phone: +92-3293568574

Objective

Aspiring Software Engineer with strong C++ programming skills and a passion for solving real-world problems. Eager to contribute to innovative software engineering projects and grow in a collaborative environment. Interested in Object-Oriented Programming, Databases (SQL), Data Structures and Algorithms, and full-stack software development.

Education

Currently pursuing BS Software Engineering (3rd Semester) at University of Engineering and Technology (UET), Lahore. Completed Matriculation with 1056/1100 marks and FSc (Pre-Medical) with 952/1100 marks.

Skills

Languages: C++ (Object-Oriented Programming), HTML, CSS

Core Concepts: Problem Solving, Algorithms, Logic Building

Tools: GitHub, Visual Studio Code

Soft Skills: Time Management, Public Speaking, Team Collaboration

Projects

Smart Quiz Maker (C++) – Console-based application for creating and managing quizzes.

Hospital Management System (C++) – Console application for managing patient records and hospital operations.

Campus Facility Management System (C++) – System to manage campus services and facilities.

Coffee Shop Website (HTML, CSS) – Responsive front-end website for a coffee shop.

FoodExpress Dispatch Optimization Engine (C++) – Optimized delivery dispatch system.

Certifications

Programming Fundamentals (C++) – UET Workshop

Goals

- Master core Software Engineering concepts including OOP, DSA, and Databases.
- Contribute to real-world software engineering projects and internships.
- Strengthen problem-solving and system design skills.
